

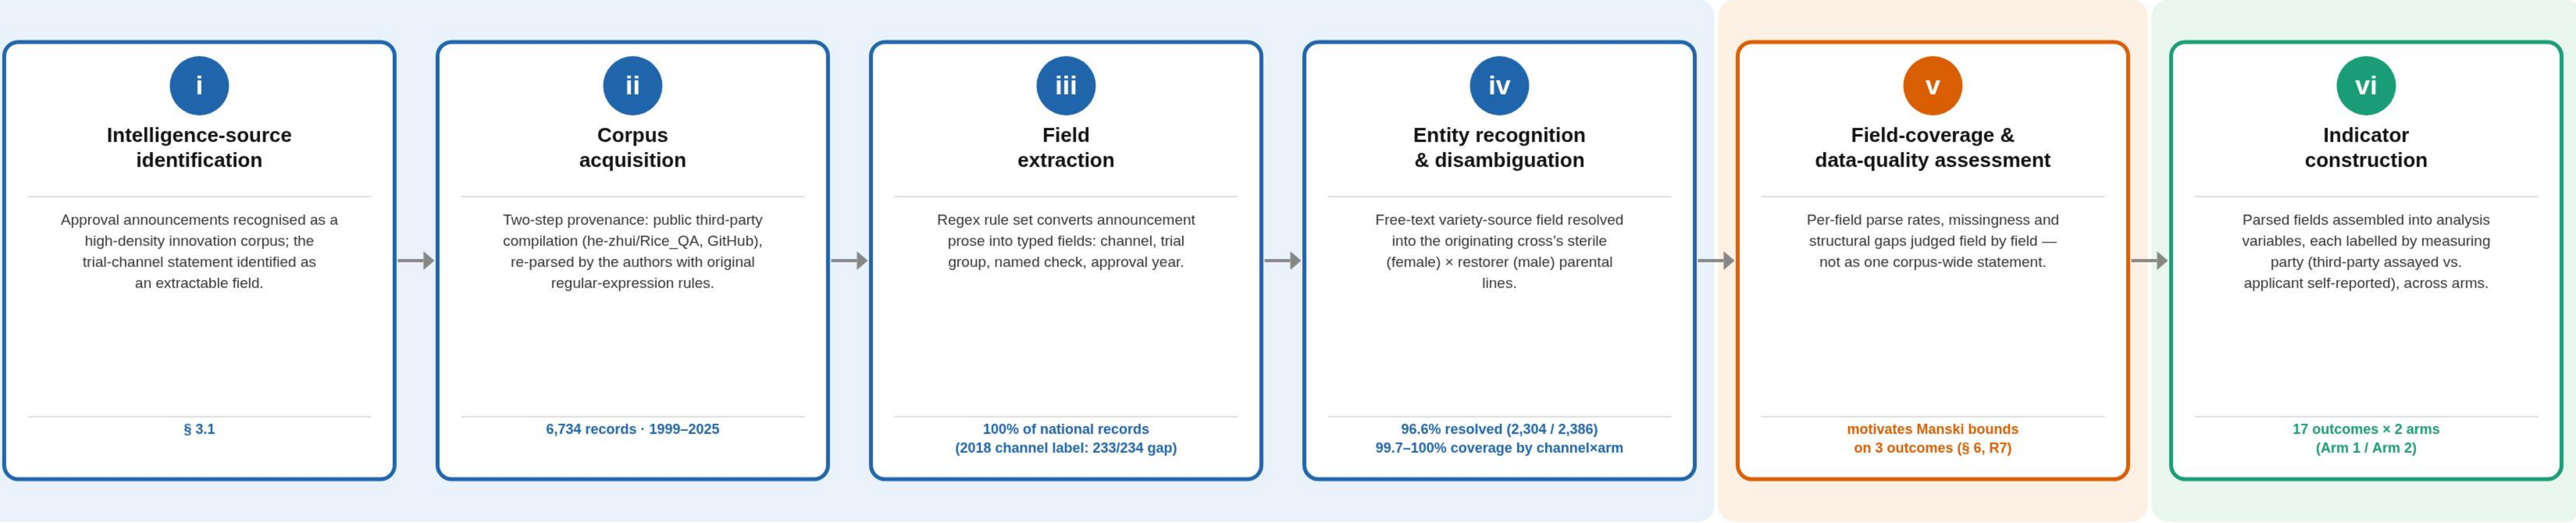

Fig. S4. The six-step S&T intelligence-extraction pipeline (§3)

Administrative rice-variety approval announcements → analysis-ready record-level indicators

Reproducing the corpus (steps i–iv)

Judging field
trustworthiness (v)

Building analysis-
ready indicators (vi)

Steps i–iv are what reproducing the corpus needs; step v is what judging any field's trustworthiness needs; step vi assembles the fields judged trustworthy into the paper's analysis variables.
